EMTEC

Experience means security

With 70 years of experience EMTEC is the specialist for storage solutions. Since February 2004 EMTEC is part of the MPO Group, the leading independent manufacturer of pre-recorded optical media in Europe and one of the quality leading manufacturers of recordable optical media in Europe.

We control the products we are selling

Together with the Quality Control Centre located in France (MPO Media) we have installed a quality management process to secure best performance of all the products we are selling:

- Compliance to Norms and Standards
- Compatibility Tests using a representative Selection of Writers and Players
- Climatic ageing Tests (Humidity and Temperature)
- UV- Protection and Scratch Resistance

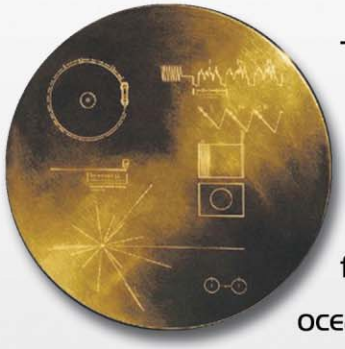
EMTEC

Make your memories last forever!

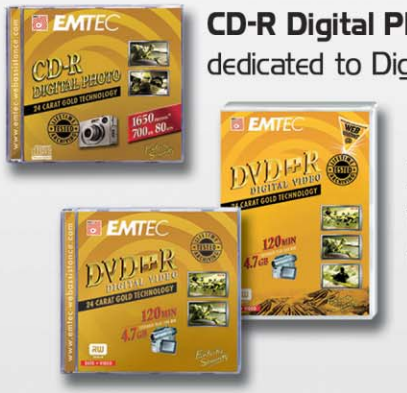
Storage Media Solutions

1977 : The Voyager space-crafts have been sent into deep space.



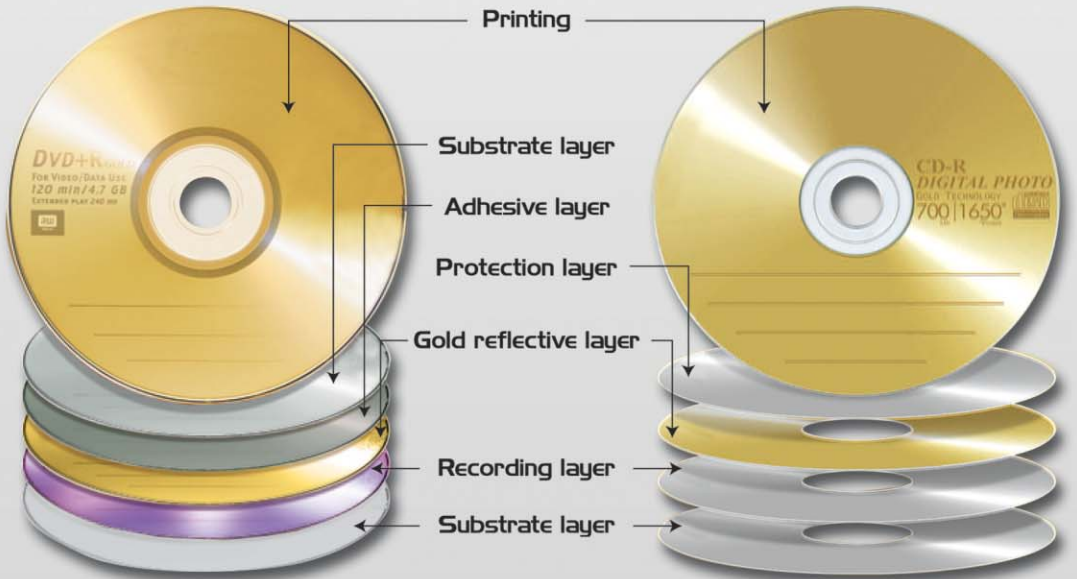
They contained a 12-inch gold-plated disk with sounds and images selected to portray the diversity of life and culture on Earth. The message was intended to extra-terrestrials that might find them in the distant future. The launching of «this bottle into the cosmic ocean» represents a hope that only an outstanding media, like a golden plate, could preserve from Time damages.

2005 : To ensure Lifetime archiving of your most valuable recordings, EMTEC launches new Gold optical media with 24 carats Gold reflective layer.



CD-R Digital Photo 700MB/80 Min,
dedicated to Digital Photo Archiving

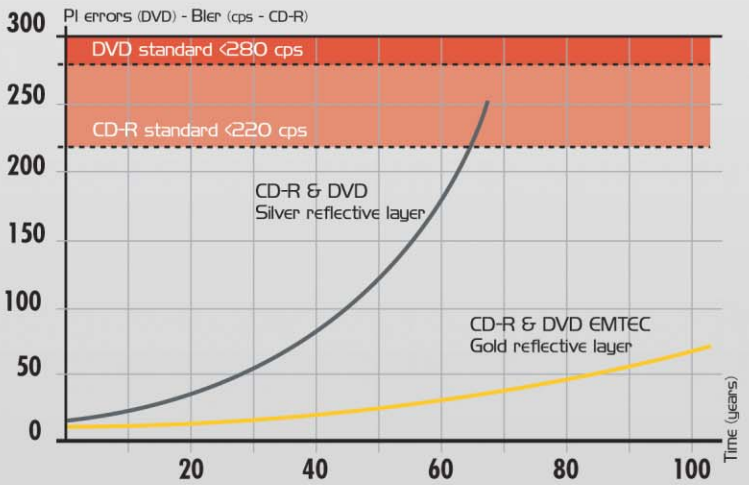
DVD+R Digital Video 4.7 GB,
the 1st DVD Gold in the market, dedicated to archiving of Digital camcorder Videos.



Structure of the EMTEC DVD+R Gold

Structure of the EMTEC CD-R Gold

Lifetime estimation under normal conditions



Depending on use and archiving conditions, up to 15% of standard CD and DVD+/-R are at risk of loosing recorded data already after one year*. Because their reflective layer is made of real 24 carat Gold, EMTEC CD and DVD Gold are immune against these external influences and guarantee secured archiving of your most valuable recordings.

* Laboratoire National d'Essais.

Because Gold is a corrosion free metal with outstanding molecular properties, the new EMTEC CDs and DVDs enable to save and read again your recorded data on a very long term, up to 100 years...
